SPECIFICATIONS

Placement

Passenger side on the floor, under front seat

Drilling Required

No - uses existing seat bolts

Seat Configuration

Pole or Pedestal

Bucket

Sold Separately

Construction/Finish

Weight 9.6 lbs.

Steel/Black Powdercoat

Dimensions

A = 18.125", B = 9.375", C = 5.375" Hole Centers = 17"

Features

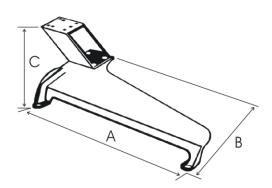

Installs in minutes with no drilling required Low profile keeps mount away from passenger leg space

Misc.

Rock solid construction Lifetime warranty

Shown with optional riser

^{*} Note that this base is best used for bucket seats.

INSTALLATION INSTRUCTIONS

- 1. If using a riser, it should be attached to the No-Drill™ base prior to attaching the base to the vehicle. For a finished look, assemble so the rounded heads of the carriage bolts are on top. A riser is not necessary for most applications.
- 2. Move the passenger seat back to its rearmost position and remove the front seat rail bolts using a 14mm socket wrench. Save and store these bolts should the mount be later removed.
- 3. Using the provided hardware, place the washers over the longer bolts, pass the bolts through the No-Drill™ base, next through the round stand-offs, and align over the threaded holes in the floor board.
- 4. Start bolts by hand to insure that the bolts do not cross thread
- 5. Using a 17mm socket wrench, fully tighten the bolts to secure the base.
- 6. After a day of use, re-tighten the seat bolts holding the mount in place.
