RAM No-Drill™ Seat Bases

RAM Mounting Systems

INSTALLATION INSTRUCTIONS

1. Move the passenger seat back to its rearmost position and remove the front seat rail bolts. Store these bolts.
2. Without moving the seat, place the No-Drill™ base over the front of the seat frame legs.
3. Align the holes in the base with those of the seat frame legs. The pedestal platform should be near the console.
4. Using the supplied longer seat bolts and washers, secure the no drill base over the seat frame legs.
5. Fully tighten the seat leg bolts. It is suggested to start these bolts by hand to avoid cross threading.
