RAM-VB-163

# RAM No-Drill™ Seat Bases

RAM Mounting Systems

## SPECIFICATIONS

### Placement

Passenger side, in front, where seat frame meets floor board.

### Drilling Required

None - uses existing seat bolts

### Seat Configuration

Bucket

### Pole or Pedestal

Ordered Separately

### Construction/Finish

Steel/Black Powdercoat

### Weight

5.5 lbs.

### Dimensions

A = 18", B = 11", C = 5.75"  
Hole Center = 16.875"

**RAM®ADJUST-A-POLE™**  
Included With Base  
Patented

Shown In Use

RAM-VB-163

## Features

Installs in minutes with no drilling required

## Misc.

Rock solid construction  
Lifetime warranty

# RAM No-Drill™ Seat Bases

RAM Mounting Systems

## INSTALLATION INSTRUCTIONS

Depending on your make and model, there may be a piece of plastic trim that covers the lower front of the seat frame. This will need to be removed and stored. If you wish to reinstall this piece of trim, you will have to modify it to fit over the stamped metal base.

1. Assemble the Adjust-A-Pole™ riser and attach to the stamped metal base. Do so with the carriage bolts passing down through the base so the nuts are on the bottom.
2. To the upper half of the Adjust-A-Pole™, attach the lower female tube that is part of the Tele-Pole assembly. Do so with the carriage bolts passing downward so the rounded part of the bolt is on top. Once completed, set aside.
3. Locate the two front seat rail bolts holding the passenger seat in place.
4. Using a 14MM socket, remove the two seat rail bolts and set them aside.
5. Place the stamped metal base under the seat with the mounting holes over those of the seat rail frame.
6. Re-install the 14MM seat rail bolts and tighten.
