

# GDS® 6-Port Charging Module for IntelliSkin® Phones in Cabinets

This charging module supports up to 6 devices with IntelliSkin® protective sleeves and can be installed along multiple modules in a cabinet with 19" industry standard racks, creating the ideal mass charging solution for a variety of use cases involving a large inventory of usable smart phones, such as museum tours, warehouses, retail, and more. Utilizing the 78W power supply, this charging module delivers 12.5W of power simultaneously to each device drawing from any standard 120V or 220V wall outlet or power strip.

## Compatible Devices:

Phones in IntelliSkin® protective sleeves

## RAM-GDS-DOCK-6G10PU

### Features:

- 6-Port charging module for most phones with IntelliSkin® protective case; charges up to 6 devices simultaneously
- Designed to be installed in 19" industry standard cabinet racks using 4-hole mounting pattern (18.312" x 3.75")
- Uses 78W power supply providing 12.5W of power to each device (5V, 2.5V); plugs into standard 120V or 220V wall outlet or power strip using AC cord
- External rocker switch to control power with LED charge status indicators
- Backed by a 3-year warranty
