

IntelliSkin® for Apple iPad 7th Generation

IntelliSkin® is a protective sleeve featuring GDS® Technology™ for the Apple iPad (7th Gen). Wrapping around the device, IntelliSkin® provides military-grade drop protection and features an integrated GDS® connector molded directly into the skin that prevents damage to the device's charging port. The exterior of the IntelliSkin® sleeve includes contacts designed for repetitive docking in field applications. This version of IntelliSkin® is compatible with the GDS® HandStand™ and shoulder strap, and also features a universal delta point that makes it compatible with Next Generation IntelliSkin® docks.
