

RAM® Tough-Case™ for Samsung Tab A 8.0 (2018) SM-T387

The RAM® Tough-Case™ is a rugged two-piece enclosure for the Samsung Galaxy Tab A 8.0 (2018) SM-T387 with a built-in coiled power cable that tethers the device inside of any vehicle. This case allows you to create a hardwired connection to the tablet using a custom USB Type-C connector, with a stretch of up to 7 ft which offers maximum tablet mobility while staying connected. Your connection will remain secured and protected with the use of oversized strain relief built into the RAM® Tough-Case™. The back of the case is intentionally left fully exposed to optimize cooling of the tablet's battery.
